

Opportunities

These optimizations can speed up your page load.

	Opportunity	Estimated Savings
1	Enable text compression	4.05 s ×
2	Remove unused CSS	2.4 s ×
3	Minify JavaScript	0.9 s ×
4	Eliminate render-blocking resources	0.85 s ×
5	Minify CSS	■ 0.3 s ∨
6	Preload key requests	■ 0.2 s ∨

Diagnostics

More information about the performance of your application.

1	Ensure text remains visible during webfont load	•	A	~
2	Serve static assets with an efficient cache policy	20 resources found	A	~
3	Minimize Critical Requests Depth	21 chains found		~
✓	Passed audits	13 aud	lits	~

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast

These are opportunities to improve the legibility of your content.

Background and foreground colors do not have a sufficient contrast ratio.

Internationalization and localization

These are opportunities to improve the interpretation of your content by users in different locales.

<html> element does not have a [lang] attribute

Names and labels

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Links do not have a discernible name
